EASY TO USE

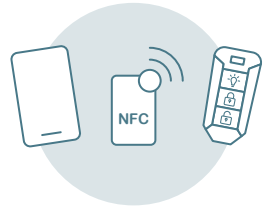

AVAILABLE FOR

AND MORE

COMPATIBLE WITH

**TERATRON  
OEM**

Keyless systems immobiliser system modules, locking aids and vehicle keys meet the highest comfort requirements. The highly secure encryption technology ensures maximum security for your product. Communication with a customized app via Bluetooth or NFC provides further added value.

Keyless systems immobiliser system modules and vehicle keys (with and without key bit) meet the highest comfort requirements. The highly secure encryption technology enables maximum product security. Communication with a customized app via Bluetooth, NFC or your predefined interface (CAN/LIN) provides significant added value.

# Smart, modular and configurable

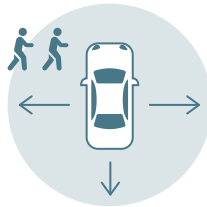

## BENEFITS

- Automotive OEM standard
- Easy to integrate
- Series proven
- Encrypted communication
- Modular
- Plug & Play
- CAN bus compatible
- Smartphone, NFC and Bluetooth capable

## SMART FUNCTIONS

Smart, handsfree and secure vehicle locking after leaving the vehicle detection radius.

Smart, handsfree and secure vehicle opening after entering the vehicle detection radius.

Define your own functions: "Coming Home", "Leaving Home" or opening the trunk.

**Make your vehicle special, make it something your customers will love. Contact us and order your free prototype!**

We can turn your smartphone into a vehicle key with our CAN to BLE module on request. Modules are IOS and Android compatible with an app that is specifically designed to meet your needs.

## Technologies
