

SMARTPHONE AS A KEY

Handsfree keyless system – comfort & security

With our innovative Bluetooth CAN module, operators can easily and reliably unlock their vehicles using a smartphone, no physical key is required.

Your benefits at a glance:

-  Smartphone replaces key
-  Fast and secure access thanks to automatic unlocking
-  Optimised workflow without delay
-  Reliability thanks to encrypted communication
-  Customised settings for individual comfort
-  Efficient and modern handling

Experience the future of access technology!
