

PC-LOC®

Automatically lock your PC.

Protect sensitive data contactlessly.

PC-LOC® prevents unattended screens and unauthorized access.

Automatic & Hands-Free

Locks your PC when you leave – unlocks it when you return

Quick & Easy Setup

Install. Connect. Done.

Industrial-Grade Security

Encrypted communication based on automotive standards

Reliable Communication

Intelligent two-factor authentication and BSI-compliant encryption

Seamless Workstation Switching

Securely transfer your applications to another workstation

How does PC-LOC® work?

The PC-LOC® reader detects whether you are present at your workstation.

When you leave the detection range, your PC is automatically locked.

When you return, your PC is automatically unlocked.
